

Abstract

Topic of the research: the questions mentioned by Al-Baghawi in his interpretation and answered them – collection and study – which is presented to obtain the Master's Degree in Interpretation and sciences of the Holy Quran.

The research included several matters:

1. The use of question and answer style by jurists in their writings according to their different sciences.
2. The use of the same style by interpreters in their books and used a lot by most of them.
3. The use of the same style by Imam Al-Baghawi in his interpretation.
4. Imam Al-Baghawi, may Allah have mercy on him, was committed to one form in asking the question which is "if it is said that" except for in one position.
5. Collecting the answers, mentioned by Imam Al-Baghawi with mentioning answers that were mentioned by other Imams. I also mentioned evidences that I had preferred of each answer. I also mentioned answers that seem to go along with evidences or explanation.
6. After collecting questions asked by Imam Al-Baghawi, I deduced some results which are as follows:
 - A) That Imam Al-Baghawi used to ask the questions in brief and answer it in brief.
 - B) He did not use to take much in the answers. He may mentioned only one answer in spite of the presence of other.
 - C) He did not use to prefer between the mentioned answers much.
 - D) Evidences that he used when mentioning the answers were variable. They also followed the style of using aphorisms.
 - E) Subjects of questions, asked by him, varied much. Whereas, he asked questions in faith, interpretation, and language.
