

## **Abstract**

Praise be to Allah, lord of the worlds. Peace and blessings be upon our prophet Muhammad and upon his family and companions.

This thesis is presented to obtain the Ph.D. degree in Al-Qraat and is titled: (Targeeb Alquraa Fe Tahtheeb Aladaa) named as Aljamee Alelmeec by Alemam Abdullatif Bin Jamal-Aldin Bin Seraj-Aldin Alomari Almoltani Alfatani Alnahrwali Alkojrati Alhindi (died in 9<sup>th</sup> century Hejri). The thesis studies and investigates from the beginning of the book till Aia (93) Sura Al-Anaam

The introduction consists of the importance of the subject, the reasons for choosing this research, the outline and methodology of this research. I have explained and elaborate all way of Quraat. Moreover, the scientists' point of view in the mathematical aspects related to Quraat. The work appeared in two sections. The first one includes the study and second section includes the investigation.

The first section consists of two chapters: the first chapter includes the bibliography of the author and a look at his ear, and the second chapter includes the book study and a detailed investigation.

The second section includes the investigation of One hundred and sixty-six page of the book.

Finally, the conclusion covers the most significant research-findings and recommendations followed by the indexes to ease the usage of the book. Among the most significant research-findings:

- ⊗ The book (Targeeb Alquraa) considered to be an enormous encyclopedia and a fundamental source for (Alquraat Alsabaa) Moreover, the book considered to be the first specialized reference for the mathematical method.
- ⊗ There is a shortage for such sources in jamaa algeaat.
