Abstract . . . . .	II
Acknowledgement . . . . .	III
Notations . . . . .	IV
Introduction . . . . .	V
<b>1 Codes; the concept and the main problem</b>	<b>1</b>
1.1 Linear Codes . . . . .	1
1.2 Description of Codes . . . . .	3
1.2.1 The Generator Matrix of Linear Code . . . . .	3
1.2.2 The Parity-Check Matrix . . . . .	5
1.3 The Main Problem of Coding Theory . . . . .	9
<b>2 Group Rings as a Ring of Matrices</b>	<b>12</b>
2.1 The Group Ring . . . . .	12
2.2 Coding Matrices for Finite Groups . . . . .	13
2.3 Hurley's Theorem . . . . .	13
2.4 Some Types of Coding Matrices . . . . .	15
2.5 Codes from Group Rings . . . . .	20
2.5.1 Unit-Derived Codes . . . . .	21
2.5.2 Zero-Divisors Codes . . . . .	25
<b>3 Coding Matrices for the Semi-Direct Product Groups</b>	<b>28</b>
3.1 The Semi-Direct Product Groups . . . . .	28
3.2 Coding Matrices of Semi-Direct Product Groups . . . . .	30
3.3 Semi-Direct Product Groups Zero-Divisor Codes . . . . .	37
