

ABSTRACT

Thesis Title: Educational Implications to be found in the Prophetic Narrations of Abdullah bin Abbas from the book of Knowledge of Saheeh Al-Bukhari.

Prepared by: Asim Jamaan Al-Sulami

Research Goal: This study aims to discover the educational implications to be found in those Prophetic traditions narrated by Abdullah bin Abbas in the Book of Knowledge of Saheeh Al-Bukhari.

Research Methodology: The researcher used the method of academic discovery.

Chapters of the Study: The study is comprised of six chapters: the first chapter discusses the general framework of the study; the second is an introduction including two sections the first being a brief biography of Abdullah bin Abbas while the second section includes a biography of Al-Bukhari and a discussion of his book Al-Jami' Al-Saheeh; the third chapter discusses the basic tenets of educational theory to be found in the Prophetic narrations of Abdullah bin Abbas; the fourth chapter outlines the education principles to be found in the Prophetic narrations of Abdullah bin Abbas; the fifth chapter discusses the educational methods to be found in the Prophetic narrations of Abdullah bin Abbas; and the sixth chapter comprises practical educational applications to be found in the Prophetic narrations of Abdullah bin Abbas in the domain of the family.

Major Results of the Study:

- 1- The Prophetic traditions are the second source of rulings after the Qur'an, and they include a complete educational methodology which can aid in the correction of behavior for the betterment of the individual and society.
- 2- The book of Knowledge of Saheeh Al-Bukhari is a cornerstone of the study of educational principles and theory and an essential reference for researchers and students alike, which can aid them in reaching new heights in their field.
- 3- Plurality and diversity of methods is essential to the success of educational practice and the realization of educational goals.

Recommendations for further Study:

- 1- More studies are necessary of the Prophetic traditions focusing on the educational methodology and principles to be found therein.
- 2- It is essential that the educational principles, methods and practical applications be put into use.
- 3- The family unit is the foremost educational influence in a child's life, and must play an active role in their education and proper upbringing.
