## Chapter 1

### General Introduction and Literature Review

1	Introduction	1
1.1	Zero-Dimensional (0-D) Nanostructured Materials: Nanoparticles	2
1.1b	One-Dimensional (1-D) Nanostructured Materials	2
1.1c	Two-Dimensional (2-D) Nanostructured Materials	3
1.1d	Three Dimensional (3D) Nanostructured Materials	4
1.2	Introduction of Metal Nanoparticles	5
1.3	Fabrication Methods of Nanomaterials	7
1.4	Top-Down Approaches	8
1.5	Bottom-up Approaches	8
1.5.1	Fabrication of Nanomaterial by Physical Methods	8
1.5.2	Fabrication of Metal Nanomaterial by Chemical Methods	8
1.5.2a	Colloid Chemistry of Metal Nanoparticles	8
1.5.2b	Chemical Reduction	9
1.5.2c	Chemical Vapor Deposition (CVD)	10

---

1.5.2d	Molecular Self-Assembly: Plasma Arcing:	11
1.6	Surface Plasmon Resonance of Some Metal Nanoparticles	11
1.7	Applications of Nanomaterials	13
1.7.1	In Diagnosis	13
1.7.2	In Health	14
1.7.3	In Environmental Applications	14
1.7.4	Nanoelectronics	14
1.7.5	In Solar Cells	15
1.7.6	In Battery Development	16
1.8	Dye-Doped Polymer Films and its Applications	17
1.9	Dye Lasers	18
1.10	Literature Survey	20

## **Chapter 2**

### **Theoretical Considerations**

2.1	Electromagnetic Radiation	26
2.2	Theoretical background of the Transmission Electron Microscope (TEM)	27
2.3	Infrared Spectroscopy	31
2.3.1	Nature of Infrared Spectra	32
2.3.2	Number of Vibration Modes in the Infrared Spectra	35
2.4	The principle of UV -Visible spectroscopy	37
2.5	X-Ray Spectroscopy	41
2.5.1	Characteristic X-Ray Radiation	42
2.5.2	Diffraction	43
2.5.3	Thomson/Rayleigh Scattering and Structure Factor	44
2.6	Scanning Electron Microscopy	46
2.6.1	Resolution and Abbe's Equation	46
2.7	Fluorescence Microscopy	48
2.7.1	Transmittance and Absorbance	51

## **Chapter 3**

### **Experimental Methods and Instruments**

3.1	The Materials Used in Preparation The Studied Samples	53
3.2	Synthesis of Metal Nanoparticles by Chemical Method at Different Conditions	56

3.2.1	Preparation of AuNPs at Different Times with Temperature Stability at 80 °C	56
3.2.2	Preparation of Rhodamine B (RhB) at Different Concentrations	57
3.2.3	Preparation of Polyacrylic Acid (PAA) Film	57
3.2.4	Preparation of AgNPs at a Temperature of 80 °C and at Different Times.	57
3.2.5	Preparation of PAA Doped with Different Concentrations of RhB and AuNPs Prepared at 80 °C for 1 Minute	58
3.2.6	Preparation of PAA Doped with Different Concentrations of RhB and AuNPs Prepared at 80 °C for 3 Minutes	59
3.2.7	Preparation of PAA Doped by Different Concentrations of RhB and AuNPs Prepared at 80 °C for 10 Minutes	60
3.2.8	Preparation of PAA Doped with Different Concentrations of RhB and AgNPs and Prepared at 80 °C for 1 Minute	60
3.2.9	Preparation of PAA Doped with Different Concentrations of RhB and AgNPs Prepared at 80 °C for 3 Minutes	61
3.2.10	Preparation of PAA Doped with Different Concentrations of RhB and AgNPs Prepared at 80 °C for 11 Minutes	62
3.3	Sample Characterizations	62
3.3.1	Transmission Electron Microscope (TEM) Technique	62
3.3.2	Fourier Transform Infrared Spectroscopy (FTIR) Technique	65
3.3.3	Ultraviolet/Visible Spectrophotometer Technique	66
3.3.4	X- Ray Diffraction Spectrometer Technique	69
3.3.5	Scanning Electron Microscopy (SEM) Technique	70
3.3.6	Fluorescence Spectrofluorometer	72

## Chapter 4

### Results and Discussion

4.1	TEM Results of Gold Nanoparticles Synthesized at 80 °C and Different Times	74
4.2	TEM Results of Silver Nanoparticles Synthesized at 80 °C and Different Times	75
4.3	Fourier Transform Infrared Spectroscopy, FTIR	76
4.3.1	FTIR Spectroscopy Results of PAA	77
4.3.2	FTIR Spectroscopy Results of RhB	80
4.3.3	FTIR Results of PAA Doped by Two Equivalent Amounts of RhB and AuNPs (11 nm) with Different Molar Ratios	82
4.3.4	FTIR Results of PAA Doped with an Equivalent Amount of RhB and AuNPs (13 nm) with Different Molar Ratios.	84
4.3.5	FTIR Results of PAA Doped by Equivalent Amount of RhB and AgNPs (13 nm) with Different Molar Ratios	86

---

4.3.6	FTIR Results of PAA Doped by an Equivalent Amount of RhB and AgNPs Sizes (19 nm) with Different Molar Ratios	88
4.4	Ultraviolet – Visible Results	90
4.4.1	UV–VIS Results of Gold Nanoparticles Synthesized at 80 °C and Different Times	91
4.4.2	UV-Visible Results of Rhodamine B at Different Concentrations	94
4.4.3	UV-Visible Results of PAA Doped with Equivalent Amounts of RhB and AuNPs Sizes (11 nm) with Different Molar Ratios	96
4.4.4	UV-Visible Results of PAA Doped with Equivalent Amounts of RhB and AuNPs Sizes (13 nm ) with Different Molar Ratios	97
4.4.5	UV–VIS Results of Silver Nanoparticles Synthesized at 80 °C and Different Times	99
4.4.6	UV-Visible Results of PAA Film Doped with Equivalent Amounts of RhB and AgNPs (13 nm) with Different Molar Ratios	101
4.4.7	UV-Visible Results of PAA Film Doped with Equivalent Amounts of RhB and AgNPs (19 nm) with Different Molar Ratios	102
4.5	Results of X-Ray diffraction (XRD)	104
4.5.1	X-Ray Diffraction Results of PAA Doped with Equivalent Amounts of RhB and AuNPs Sizes (11 nm)	104
4.5.2	X-Ray Diffraction Results of PAA Doped with Equivalent Amounts of RhB and AuNPs sizes (13 nm)	106
4.5.3	X-Ray Diffraction Results of PAA Doped with Equivalent Amounts of RhB and AgNPs Sizes (13 nm)	107
4.5.4	X-Ray Diffraction Results of PAA Doped with Equivalent Amounts of RhB and AgNPs Sizes (19 nm)	109
4.6	Results of Scanning Electron Microscopy (SEM)	110
4.6.1	SEM Results of PAA Doped by an Equivalent Amount of RhB and AuNPs (11 nm), RhB and AuNPs (13 nm)	111
4.6.2	SEM Results of PAA Doped with Equivalent Amounts of RhB and AgNPs (13 nm) and AgNPs (19 nm)	112
4.7	Fluorescence	113
4.7.1	Fluorescence Results of PAA Film Doped with Equivalent Amounts of RhB and AuNPs (11 nm) with Different Molar Ratios	114
4.7.2	Fluorescence Results of PAA Film Doped with Equivalent Amounts of RhB and AuNPs (13 nm ) with Different Molar Ratios	117

---

4.7.3	Fluorescence Results of PAA Film Doped with Equivalent Amounts of RhB and AgNPs (13 nm ) with Different Molar Ratios	120
4.7.4	Fluorescence Results of PAA Film Doped with Equivalent Amounts of RhB and AgNPs (19 nm ) with Different Molar Ratios	123
	Conclusion	126
	References	128
	Arabic Summary	142
